Table F-1 Groundwater Quality Data.pdf

Eva and Susan,

The Appendix F that was attached to the previous email (below) still had the old Table F-1 (which contains some outdated PRGs). The correct one is attached.

I expect your hard copies also have the old version. Let us know if you would like us to send you replacement pages.

Sorry for the confusion,
Jeremy

Subject: BGW - RI_FS Work Plan - revisions and response to comments

Hi Eva,

Welcome back from vacation. The hard copy of the RI/FS Work Plan should have arrived by now, let us know if you don't have it.

Two items:

- 1) We found two errors in the .pdf deliverable we sent on 2/28:
 - Table A-5 did not include NAPL petrophysical methods.
 - Appendix F (data tables) had the last version's PRGs listed.

We've corrected those, and updated Table A-5 and Appendix F are attached. Let us know if you want a revised complete .pdf of the Appendices. The hard copies include the corrected versions.

- 2) We have prepared responses to EPA's collective comments on the previous version of the work plan. On the call in January, you indicated you did not need a formal response to comments. However, we ended up preparing them for our own purposes and thought it might be helpful to share it. These responses, which are in red in the attached Word documents, are on EPA's comments and associated meeting minutes regarding the upland and marine investigations, and on EPA's final comments transmitted on 12/30/16.

Let us know if you have any questions/comments on these items. We can also discuss them, along with any

preliminary comments on the work plan, in our call on Wednesday. Look forward to talking to you then.

Thanks,
Jeremy
